

G7: Supercharge your gas detection program.

Minimize the hassle.

WE THOUGHT OF EVERYTHING SO YOU DON'T HAVE TO.

Next Level Gas Detection

Although you can treat it like the gas detector you're used to, G7 is unlike anything you've experienced. As the first and only direct-to-cloud gas detector, you'll be able to view and manage your entire fleet from anywhere and every unit will always be correctly configured and up to date.

Unparalleled Safety

From our patented SOS latch to available 24/7 live monitoring, emergency response and evacuation management tools, no call for help will ever go unanswered. And G7's durable, weatherproofed design ensures it can handle any situation.

Automated Compliance and Interactive Reporting

Never collect another data log or build a report again. G7's cloud connectivity powers a live dashboard to let you see every bump test, calibration and usage information. Interactive reports digest all data to make your reporting cycles accurate and effortless.

Ready for Whatever's Next

G7 was designed to support a safe, connected worksite. From pump and satellite module options to more than 20 name-brand sensors, push-to-talk, monitoring services and area gas monitoring, G7 can integrate into your safety program and grow with you.
