NOTES: Thomas Products Spill Control Cabinets are manufactured for the most durable protection for the storage of spill control equipment and chemicals used for hazardous waste clean-up.

Impressive Spill Control Cabinets

Thomas Products fiberglass spill control cabinets are designed to store and protect equipment and chemicals used in the clean up of hazardous waste spills. Thomas Products fiberglass cabinets are manufactured with high quality materials and designed to protect spill control equipment and materials from exposure to harsh UV rays, chemicals, moisture, dust, salt air, insects, and temperature extremes.

These fiberglass cabinets are manufactured under U.S. Patent No. 4,998,587 and are available in a multitude of UV inhibiting colors as well as interiors designed to meet your specifications. Their rugged and durable construction combine to produce a dependable and virtually air tight enclosure with a much longer life expectancy than steel, aluminum, wood, or plastic enclosures. These fiberglass cabinets can be wall mounted, attached to handrails, bulkheads, or designed to be free standing.
